INDEX OF SUBJECTS AND AUTHORS

Absorption of pulmonary deposits, The. Clinical studies of the healing of pulmonary tuberculosis, I, 227

Action of quartz-mercury-vapor irradiation on inhalation tuberculosis in primarily infected and sensitized guinea pigs, The. Studies with ultraviolet light, II, 157

Active and latent tuberculosis in the negro race, 265

—— pulmonary tuberculosis, Pathological evidence of first infection in association with, 249

—— tuberculosis, Serum precipitation findings in, 449

Agglutinins for tubercle bacilli, The non-effect of irradiation with the mercury arc on the production of, 141

Air embolism and artificial pneumothorax, 591

Alcohol, The local effect of, on experimental tuberculosis, 454

ALEXANDER, JOHN. Total paralysis of the hemidiaphragm for early pulmonary tuberculosis, 27

AMBERSON, J. BURNS, JR. Clinical studies of the healing of pulmonary tuberculosis. I. The absorption of pulmonary deposits, 227

Anatomic changes, pulmonary, The value of percussion in the demonstration of, 659

ANDRUS, PAUL M. The value of percussion in the demonstration of pulmonary anatomic changes, 659

Animals, experimental, and man, intestinal tuberculosis in, The early lesion of, 351

Annular shadows and cavities, Observations of, at the Cincinnati Tuberculosis Sanatorium, 306

Anticipatory detuberculization, On, 633

Apices of the lungs, frequent occurrence of tuberculosis at the, Reasons for the, 177

Artery, pulmonary, Ligation of the, combined with resection of the phrenic nerve in chronic inflammatory conditions, especially pulmonary tuberculosis, 35

Artificial pneumothorax, Air embolism and, 591

—— ——, Contralateral exudative pleuritis complicating, 583

—— ——, —— lung in pulmonary tuberculosis treated by, Observations concerning the, 562

—— ——, partial, in early pulmonary tuberculosis, Observations on, 630

—— ——, pathology of, in pulmonary tuberculosis, The, 501

—— ——, The classification of, and the clinical value of the several types, 540

—— ——, —— suspension stability rate of erythrocytes in pulmonary tuberculosis and its significance in, 606

—— —— treatment, The value of the vital-capacity test in. Studies on the respiratory organs in health and disease, XX, 597

Auto-urine reaction, Wildbolz, Studies on the, 78

Bacilli, tubercle, agglutinins for, The non-effect of irradiation with the mercury arc on the production of, 141

——, ——, in the bile, A study of the presence of, and of the tuberculous lesions of the liver in experimental animals, 392

——, ——, Schulte-Tigges and Ziehl-Neelsen methods of staining, A comparison of the, 656

Bacilluria, excretory, Experimental renal tuberculosis with special reference to, 370

Bactericidal action of quartz-mercury-vapor light irradiation, The. Studies with ultraviolet light, III, 166

Bactericidal effect of quartz-mercury-vapor light irradiation of blood circulating in vitro, The. Studies with ultraviolet light, IV, 170

Bailey, William, and Myers, J. A. Studies on the respiratory organs in health and disease. XX. The value of the vital-capacity test in artificial-pneumothorax treatment, 597

Balderrey, Frank C., and Lo Grasso, Horace. Heliotherapy in the treatment of pulmonary tuberculosis, 117

Barkus, Otakar. The non-effect of irradiation with the mercury arc on the production of agglutinins for tubercle bacilli, 141

Baum, Felix. Serum precipitation findings in active tuberculosis, 449

Bendove, Raphael A. The classification of artificial pneumothorax and the clinical value of the several types, 540

Bile, tubercle bacilli in the, A study of the presence of, and of the tuberculous lesions of the liver in experimental animals, 392

Bisaillon, Marr, Matson, Ray W., and Matson, Ralph C. Observations concerning the contralateral lung in pulmonary tuberculosis treated by artificial pneumothorax, 562

Bishop, H. A. Air embolism and artificial pneumothorax, 591

Blood, Cholesterol esters of the, in tuberculosis, 329

—— circulating in vitro, The bactericidal effect of quartz-mercury-vapor light irradiation of. Studies with ultraviolet light, IV, 170

—— serum in tuberculosis, The calcium and inorganic phosphorus content of the, 408

—— flow through the lungs in experimental pneumothorax, The, 534

Bray, H. A. Further remarks on mutations of pulmonary shadows due to type of breathing, 649

Breathing, mutations of pulmonary shadows due to type of, Further remarks on, 649

Bruns, Earl H. Heliotherapy in tuberculous spondylitis, 132

Calcium and inorganic phosphorus content of the blood serum in tuberculosis, The, 408

Calmette's protective inoculation against tuberculosis, 219

Cause of the high tuberculosis death rate among negroes, Racial characteristics as the, 275

Cavitation, Intrapulmonary, in tuberculosis, 319

Characteristics, Racial, as the cause of the high tuberculosis death rate among negroes, 275

Chemical researches now being conducted on grants from the National Tuberculosis Association, A report of a conference on the, 460

Chest roentgenograms, A graphic method of reporting, 175

Children, The results of Pirquet tuberculin tests on 1654, in a rural community in Minnesota, 299

Cholesterol esters of the blood in tuberculosis, 329

Chronic inflammatory conditions, especially pulmonary tuberculosis, Ligation of the pulmonary artery combined with resection of the phrenic nerve in, 35

Cincinnati Tuberculosis Sanatorium, Observations of annular shadows and cavities at the, 306

Classification of artificial pneumothorax and the clinical value of the several types, The, 540

Clinical studies of the healing of pulmonary tuberculosis. I. The absorption of pulmonary deposits, 227

Colds, epidemic, Hemoptysis in association with, in patients with pulmonary tuberculosis, 335

Collapse, thoracoplastic, The surgical treatment of pulmonary tuberculosis by, 9

Comparison of the Schulte-Tigges and Ziehl-Neelsen methods of staining tubercle bacilli. A, 656

Complicating artificial pneumothorax, Contralateral exudative pleuritis, 583

Conference on the chemical researches now being conducted on grants from the National Tuberculosis Association, A report of a, 460

Contralateral exudative pleuritis complicating artificial pneumothorax, 583
—— lung in pulmonary tuberculosis treated by artificial pneumothorax, Observations concerning the, 562
Cornea, experimental tuberculosis of the, in rabbits, The effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on. Studies with ultraviolet light, I, 146

Daranyi flocculation reaction in pulmonary tuberculosis, The, 441
Death rate, high tuberculosis, among negroes, Racial characteristics as the cause of the, 275
Demonstration of pulmonary anatomic changes, The value of percussion in the, 659
Deposits, pulmonary, The absorption of. Clinical studies of the healing of pulmonary tuberculosis, I, 227
Derivatives of tuberculin, Diagnostic and sensitizing properties of some new. Studies in tuberculosis immunity, I, 681
Detuberculization, anticipatory, On, 633
Diagnosis of pulmonary tuberculosis, A method of teaching students the, 210
——, pulmonary, thoracoscope in, The, 67
Diagnostic and sensitizing properties of some new derivatives of tuberculin. Studies in tuberculosis immunity, I, 681
Dock, W., and Harrison, T. R. The blood-flow through the lungs in experimental pneumothorax, 534
Drolet, Godias J. The inheritance factor in tuberculosis: predisposition or immunity, 280
Dunham, Kennon, and Norton, Vera. Observations of annular shadows and cavities at the Cincinnati Tuberculosis Sanatorium, 306
Dworski, Morris, and Mayer, Edgar. Studies with ultraviolet light. I. The effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on experimental tuberculosis of the cornea in rabbits, 146
——, ——, —— ——, ——. —— —— —— ——. II. The reaction of quartz-mercury-vapor irradiation on inhalation tuberculosis in primarily infected and sensitized guinea pigs, 157
——, ——, —— ——, ——. —— —— —— ——. III. The bactericidal action of quartz-mercury-vapor light irradiation, 166

Early lesion of intestinal tuberculosis in experimental animals and man, The, 351
—— pulmonary tuberculosis, partial artificial pneumothorax in, Observations on, 630
—— —— ——, Total paralysis of the hemidiaphragm for, 27
Eberson, Frederick C. Studies in tuberculosis immunity. I. Diagnostic and sensitizing properties of some new derivatives of tuberculin, 681
Editorial. Calmette's protective inoculation against tuberculosis, 219
Effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on experimental tuberculosis of the cornea in rabbits, The. Studies with ultraviolet light, I, 146
Electrocautery in the treatment of laryngeal and pharyngeal tuberculosis, The, 73
Embolism, Air, and artificial pneumothorax, 591
Enright, John J., and Rettger, Leo F. Studies on the Wildbolz auto-urine reaction, 78
Epidemic colds, Hemoptysis in association with, in patients with pulmonary tuberculosis, 335
Erythrocyte sedimentation determinations in pulmonary tuberculosis, The value of, 431
Erythrocytes, The suspension stability rate of, in pulmonary tuberculosis and its significance in artificial pneumothorax, 606
Esters, Cholesterol, of the blood in tuberculosis, 329
Evidence of first infection, Pathological, in association with active pulmonary tuberculosis, 249
Excretory bacilluria, Experimental renal tuberculosis with special reference to, 370

Experiment in treating tuberculosis as a family problem, The Home Hospital, an, 639
Experimental animals, A study of the presence of tubercle bacilli in the bile and of the tuberculous lesions of the liver in, 392
—— —— and man, intestinal tuberculosis in, The early lesion of, 351
—— pneumothorax, The blood-flow through the lungs in, 534
—— renal tuberculosis, with special reference to excretory bacilluria, 370
—— tuberculosis, The local effect of alcohol on, 454
—— —— of the cornea in rabbits, The effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on. Studies with ultraviolet light, I, 146
Extrapleural thoracoplasty in the treatment of pulmonary tuberculosis, 1
Exudative pleuritis, Contralateral, complicating artificial pneumothorax, 583

Family problem, The Home Hospital, an experiment in treating tuberculosis as a, 639
FINE, M. J. Observations on partial artificial pneumothorax in early pulmonary tuberculosis, 630
First infection, Pathological evidence of, in association with active pulmonary tuberculosis, 249
FISCHEL, KARL. The suspension stability rate of erythrocytes in pulmonary tuberculosis and its significance in artificial pneumothorax, 606
Flocculation reaction, Daranyi, in pulmonary tuberculosis, The, 441
Frequent occurrence of tuberculosis at the apices of the lungs, Reasons for the, 177

GARDNER, LEROY U. The pathology of artificial pneumothorax in pulmonary tuberculosis, 501
GEBHART, JOHN C., AND MILLER, JAMES ALEXANDER. The Home Hospital, an experiment in treating tuberculosis as a family problem, 639
GOLDBERG, MAX, AND LORBER, MILTON B. The local effect of alcohol on experimental tuberculosis, 454
GRANDY, CHARLES R. Racial characteristics as the cause of the high tuberculosis death rate among negroes, 275
Grants from the National Tuberculosis Association, A report of a conference on the chemical researches now being conducted on, 460
Graphic method of reporting chest roentgenograms, A, 175
GRAY, CORA E., AND WINSLOW, C.-E. A. Tuberculosis mortality in relation to the pasteurization of municipal milk supplies, 186
GREENE, JOSEPH B. The electrocautery in the treatment of laryngeal and pharyngeal tuberculosis, 73
Guinea pigs, inhalation tuberculosis in primarily infected and sensitized, The action of quartz-mercury-vapor irradiation on. Studies with ultraviolet light, II, 157
GUTTMACHER, MANFRED, AND MAYER, EDGAR. Studies with ultraviolet light. IV. The bactericidal effect of quartz-mercury-vapor light irradiation of blood circulating in vitro, 170

HARRISON, T. R., AND DOCK, W. The blood-flow through the lungs in experimental pneumothorax, 534
Healing of pulmonary tuberculosis, Clinical studies of the. I. The absorption of pulmonary deposits, 227
Heliotherapy in the treatment of pulmonary tuberculosis, 117
—— —— tuberculous spondylitis, 132
Hemidiaphragm, Total paralysis of the, for early pulmonary tuberculosis, 27
Hemoptysis in association with epidemic colds in patients with pulmonary tuberculosis, 335
High tuberculosis death rate among negroes, Racial characteristics as the cause of the, 275
Home Hospital, The, an experiment in treating tuberculosis as a family problem, 639

HOWE, MARION G., AND MEDLAR, E. M. The calcium and inorganic phosphorus content of the blood serum in tuberculosis, 408

Immunity, Predisposition or: The inheritance factor in tuberculosis, 280
——, tuberculosis, Studies in. I. Diagnostic and sensitizing properties of some new derivatives of tuberculin, 681
Infected, primarily, and sensitized guinea pigs, The action of quartz-mercury-vapor irradiation on inhalation tuberculosis in. Studies with ultraviolet light, II, 157
Infection, first, Pathological evidence of, in association with active pulmonary tuberculosis, 249
Inflammatory conditions, chronic, especially pulmonary tuberculosis, Ligation of the pulmonary artery combined with resection of the phrenic nerve in, 35
Inhalation tuberculosis in primarily infected and sensitized guinea pigs, The action of quartz-mercury-vapor irradiation on. Studies with ultraviolet light, II, 157
Inheritance factor in tuberculosis, The: predisposition or immunity, 280
Injection, intracutaneous, of tuberculous and other pathological urines, A study of the reaction resulting from the, 668
Inoculation, Calmette's protective, against tuberculosis, 219
Inorganic phosphorus, The calcium and, content of the blood serum in tuberculosis, 408
Intestinal tuberculosis in experimental animals and man, The early lesion of, 351
Intracutaneous injection of tuberculous and other pathological urines, A study of the reaction resulting from the, 668
Intrapulmonary cavitation in tuberculosis, 319
Irradiation, quartz-mercury-vapor light, of blood circulating in vitro, The bactericidal effect of. Studies with ultraviolet light, IV, 170
Irradiation, quartz-mercury-vapor light, The bactericidal action of. Studies with ultraviolet light, III, 166
——, —— —— ——, The action of, on inhalation tuberculosis in primarily infected and sensitized guinea pigs. Studies with ultraviolet light, II, 157
—— with the mercury arc, The non-effect of, on the production of agglutinins for tubercle bacilli, 141
Irradiations, The effect of quartz-mercury-vapor (Alpine quartz-light), on experimental tuberculosis of the cornea in rabbits. Studies with ultraviolet light, I, 146

KAUFMAN, ISADORE. A method of teaching students the diagnosis of pulmonary tuberculosis, 210
KENDRICK, PEARL L., AND MILLS, ORA M. A comparison of the Schulte-Tigges and Ziehl-Neelsen methods of staining tubercle bacilli, 656

LAMBERT, ADRIAN V. S., AND MILLER, JAMES ALEXANDER. The surgical treatment of pulmonary tuberculosis by thoracoplastic collapse, 9
Laryngeal and pharyngeal tuberculosis, treatment of, The electrocautery in the, 73
Latent tuberculosis in the negro race, Active and, 265
Lesion, early, of intestinal tuberculosis in experimental animals and man, The, 351
Ligation of the pulmonary artery combined with resection of the phrenic nerve in chronic inflammatory conditions, especially pulmonary tuberculosis, 35
Light, ultraviolet, Studies with. I. The effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on experimental tuberculosis of the cornea in rabbits, 146
——, ——, —— ——. II. The action of quartz-mercury-vapor irradiation on inhalation tuberculosis in primarily infected and sensitized guinea pigs, 157

Light, ultraviolet, Studies with. III. The bactericidal action of quartz-mercury-vapor light irradiation, 166

——, ——, —— ——. IV. The bactericidal effect of quartz-mercury-vapor light irradiation of blood circulating in vitro, 170

Liver, tuberculous lesions of the, in experimental animals, A study of the presence of tubercle bacilli in the bile and of the, 392

Local effect of alcohol on experimental tuberculosis, The, 454

LoGrasso, Horace, and Balderrey, Frank C. Heliotherapy in the treatment of pulmonary tuberculosis, 117

Lorber, Milton B., and Goldberg, Max. The local effect of alcohol on experimental tuberculosis, 454

Lung, contralateral, in pulmonary tuberculosis treated by artificial pneumothorax, Observations concerning the, 562

Lungs, The blood-flow through the, in experimental pneumothorax, 534

——, tuberculosis at the apices of the, Reasons for the frequent occurrence of, 177

Man, intestinal tuberculosis in experimental animals and, The early lesion of, 351

Matson, Ralph C., Bisaillon, Marr, and Matson, Ray W. Observations concerning the contralateral lung in pulmonary tuberculosis treated by artificial pneumothorax, 562

Matson, Ray W., Matson, Ralph C., and Bisaillon, Marr. Observations concerning the contralateral lung in pulmonary tuberculosis treated by artificial pneumothorax, 562

Mayer, Edgar, and Dworski, Morris. Studies with ultraviolet light. I. The effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on experimental tuberculosis of the cornea in rabbits, 146

——, ——, —— ——, ——. —— —— —— ——. II. The action of quartz-mercury-vapor irradiation on inhalation tuberculosis in primarily infected and sensitized guinea pigs, 157

Mayer, Edgar, and Dworski, Morris. Studies with ultraviolet light. III. The bactericidal action of quartz-mercury-vapor light irradiation, 166

Mayer, Edgar, and Guttmacher, Manfred. Studies with ultraviolet light. IV. The bactericidal action of quartz-mercury light irradiation of blood circulating in vitro, 170

Medlar, E. M., and Howe, Marion G. The calcium and inorganic phosphorus content of the blood serum in tuberculosis, 408

——, ——. ——, —— Sasano, K. T. A study of the presence of tubercle bacilli in the bile and of tuberculous lesions of the liver in experimental animals, 392

——, ——. ——., —— ——, ——. ——. Renal tuberculosis with special reference to excretory bacilluria, 370

——, ——. ——., —— ——, ——. ——. The early lesion of intestinal tuberculosis in experimental animals and man, 351

Mercury arc, irradiation with the, The non-effect of, on the production of agglutinins for tubercle bacilli, 141

Method of reporting chest roentgenograms, A graphic, 175

—— —— teaching students the diagnosis of pulmonary tuberculosis, A, 210

Methods of staining tubercle bacilli, Schulte-Tigges and Ziehl-Neelsen, A comparison of the, 656

Milk supplies, municipal, pasteurization of, Tuberculosis mortality in relation to the, 186

Miller, James Alexander, and Gebhart, John C. The Home Hospital, an experiment in treating tuberculosis as a family problem, 639

——, —— ——, —— Lambert, Adrian V. S. The surgical treatment of pulmonary tuberculosis by thoracoplastic collapse, 9

Mills, Ora M., and Kendrick, Pearl L. A comparison of the Schulte-Tigges and Ziehl-Neelsen methods of staining tubercle bacilli, 656

Minnesota, rural community in, The results of Pirquet tuberculin tests on 1654 children in a, 299

Morriss, W. H. The value of erythrocyte sedimentation determinations in pulmonary tuberculosis, 431
Mortality, Tuberculosis, in relation to the pasteurization of municipal milk supplies, 186
Municipal milk supplies, pasteurization of, Tuberculosis mortality in relation to the, 186
Mutations of pulmonary shadows due to type of breathing, Further remarks on, 649
Myers, J. A., and Bailey, William. Studies on the respiratory organs in health and disease. XX. The value of the vital-capacity test in artificial-pneumothorax treatment, 597

National Tuberculosis Association, A report of a conference on the chemical researches now being conducted on grants from the, 460
Negro race, tuberculosis in the, Active and latent, 265
Negroes, high tuberculosis death rate among, Racial characteristics as the cause of the, 275
Nerve, phrenic, resection of the, Ligation of the pulmonary artery combined with, in chronic inflammatory conditions, especially pulmonary tuberculosis, 35
New derivatives of tuberculin, Diagnostic and sensitizing properties of some. Studies in tuberculosis immunity, I, 681
—— sterilizer for sputum, A, 206
Non-effect of irradiation with the mercury arc on the production of agglutinins for tubercle bacilli, The, 141
Norton, Vera, and Dunham, Kennon. Observations of annular shadows and cavities at the Cincinnati Tuberculosis Sanatorium, 306

Obituary. Orville W. McMichael, 498
——. Philip Challis Bartlett, 216
Observations concerning the contralateral lung in pulmonary tuberculosis treated by artificial pneumothorax, 562
—— of annular shadows and cavities at the Cincinnati Tuberculosis Sanatorium, 306
Observations on partial artificial pneumothorax in early pulmonary tuberculosis, 630

THEARLE, WILLIAM H. Extrapleural thoracoplasty in the treatment of pulmonary tuberculosis, 1
Thoracoplastic collapse, The surgical treatment of pulmonary tuberculosis by, 9
Thoracoplasty, Extrapleural, in the treatment of pulmonary tuberculosis, 1

Thoracoscope in pulmonary diagnosis, The, 67
Total paralysis of the hemidiaphragm for early pulmonary tuberculosis, 27
Treating tuberculosis as a family problem, The Home Hospital, an experiment in, 639
Treatment, artificial-pneumothorax, The value of the vital-capacity test in. Studies on the respiratory organs in health and disease, XX, 597
—— of laryngeal and pharyngeal tuberculosis, The electrocautery in the, 73
—— —— pulmonary tuberculosis, Extrapleural thoracoplasty in the, 1
—— —— —— ——, Heliotherapy in the, 117
—— —— —— ——, surgical, The, 20
—— —— —— ——, ——, The, by thoracoplastic collapse, 9
——, surgical, of pulmonary tuberculosis, The, 20
Tubercle bacilli, agglutinins for, The non-effect of irradiation with the mercury arc on the production of, 141
—— —— in the bile, A study of the presence of, and of the tuberculous lesions of the liver in experimental animals, 392
—— ——, Schule-Tigges and Ziehl-Neelsen methods of staining, A comparison of the, 656
Tuberculin, Diagnostic and sensitizing properties of some new derivatives of. Studies in tuberculosis immunity, I, 681
—— tests, Pirquet, on 1654 children in a rural community in Minnesota, The results of, 299
Tuberculosis, active, Serum precipitation findings in, 449
—— as a family problem, The Home Hospital, an experiment in treating, 639
—— at the apices of the lungs, Reasons for the frequent occurrence of, 177
——, Calmette's protective inoculation against, 219
——, Cholesterol esters of the blood in, 329
—— death rate, high, among negroes, Racial characteristics as the cause of the, 275
——, experimental, of the cornea in rabbits, The effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on. Studies with ultraviolet light, I, 146
——, ——, The local effect of alcohol on, 454
—— immunity, Studies in. I. Diagnostic and sensitizing properties of some new derivatives of tuberculin, 681
—— in the negro race, Active and latent, 265
——, inhalation, in primarily infected and sensitized guinea pigs, The action of quartz-mercury-vapor irradiation on. Studies with ultraviolet light, II, 157
——, intestinal, in experimental animals and man, The early lesion of, 351
——, Intrapulmonary cavitation in, 319
——, laryngeal and pharyngeal, treatment of, The electrocautery in the, 73
—— mortality in relation to the pasteurization of municipal milk supplies, 186
Tuberculosis, pulmonary, active, Pathological evidence of first infection in association with, 249
——, ——, artificial pneumothorax in, The pathology of, 501
——, ——, diagnosis of, A method of teaching students the, 210
——, ——, early, partial artificial pneumothorax in, Observations on, 630
——, ——, ——, Total paralysis of the hemidiaphragm for, 27
——, ——, erythrocyte sedimentation determinations in, The value of, 431
——, ——, healing of, Clinical studies of the. I. The absorption of pulmonary deposits, 227
——, ——, Hemoptysis in association with epidemic colds in patients with, 335
——, ——, Ligation of the pulmonary artery combined with resection of the phrenic nerve in chronic inflammatory conditions, especially, 35
——, ——, surgical treatment of, The, by thoracoplastic collapse, 9
——, ——, The Daranyi flocculation reaction in, 441
——, ——, The suspension stability rate of erythrocytes in, and its significance in artificial pneumothorax, 606

Tuberculosis, pulmonary, treated by artificial pneumothorax, Observations concerning the contralateral lung in, 562
——, ——, treatment of, Extrapleural thoracoplasty in the, 1
——, ——, —— ——, Heliotherapy in the, 117
——, ——, —— ——, surgical, The, 20
——, ——, —— ——, ——, The, by thoracoplastic collapse, 9
Tuberculosis, renal, Experimental, with special reference to excretory bacilluria, 370
——, The calcium and inorganic phosphorus content of the blood serum in, 408
——, —— inheritance factor in: predisposition or immunity, 280
——, treatment of laryngeal and pharyngeal, The electrocautery in the, 73
Tuberculous and other pathological urines, A study of the reaction resulting from the intracutaneous injection of, 668
—— lesions of the liver in experimental animals, A study of the presence of tubercle bacilli in the bile and of the, 392
—— spondylitis, Heliotherapy in, 132
Type of breathing, mutations of pulmonary shadows due to, Further remarks on, 649

Ultraviolet light, Studies with. I. The effect of quartz-mercury-vapor irradiations (Alpine quartz-light) on experimental tuberculosis of the cornea in rabbits, 146
—— ——, —— ——. II. The action of quartz-mercury-vapor irradiation on inhalation tuberculosis in primarily infected and sensitized guinea pigs, 157
—— ——, —— ——. III. The bactericidal action of quartz-mercury-vapor light irradiation, 166
—— ——, —— ——. IV. The bactericidal effect of quartz-mercury-vapor light irradiation of blood circulating in vitro, 170
Urines, tuberculous and other pathological, A study of the reaction resulting from the intracutaneous injection of, 668

Value of erythrocyte sedimentation determinations in pulmonary tuberculosis, The, 431
—— —— percussion in the demonstration of pulmonary anatomic changes, The, 659
—— —— the vital-capacity test in artificial pneumothorax treatment, The. Studies on the respiratory organs in health and disease, XX, 597
Vital-capacity test, The value of, in artificial-pneumothorax treatment. Studies on the respiratory organs in health and disease, XX, 597
